

TimFlix (Plex)

TIMFLIX

TimFlix is a suite of media libraries running on a self-hosted **Plex Media Server**.

These libraries are available to anyone that has a Plex account and has been invited or approved to access my server.

A Plex account can be obtained for free from **Plex**

Once approved for access, my libraries will appear on any Plex client (Web browser, android, IOS, Roku, Amazon Firestick, Apple TV, and various Smart TVs) on which you have signed in using your Plex account.

You may have to 'pin' the new libraries to make them visible all the time on whatever Plex client you are using. This is done from the Plex menu.

My libraries will show up in addition to whatever Plex libraries you may currently have. My libraries will have 'TimFlix' as part of the library name so you will know which libraries are mine. For example, TimFlix - Movies
